*Leading the Way in Advanced Water Treatment Solutions*

# WATERTECH

## INDIA SYSTEMS & CHEMICALS

### ABOUT US

Watertech India Systems & Chemicals located in the heart of Ahmedabad, Gujarat has established itself as a trusted leader in the water treatment industry. With a strong focus on innovation, quality, and customer satisfaction, we manufacture a wide range of water treatment chemicals and equipment to meet the diverse needs of industries worldwide. Our solutions are designed to ensure efficient water management, enhancing both operational productivity and environmental sustainability.

### MISSION

We are committed to delivering high-quality water treatment chemicals and equipment that help industries manage water resources efficiently, reduce waste, and maintain compliance with environmental standards.

### VISSION

To be a global leader in water treatment technologies by providing cutting-edge solutions that protect the environment and conserve water for future generations.

# BOILER WATER TREATMENT CHEMICALS

Our boiler water treatment chemicals are designed to improve efficiency, prevent damage, and ensure long-lasting performance for industrial boilers.

## WAT C 20B (Anti-Scalant)

Prevents scale buildup, ensuring better heat transfer and reduced energy consumption.

## WAT C 20B OS (Oxygen Scavenger)

Protects metal surfaces by removing dissolved oxygen, preventing corrosion.

## WAT C 20B pH (pH Booster)

Maintains optimal pH levels to prevent corrosion and scale formation.

## WAT C 20B SC (Sludge Conditioner)

Prevents sludge formation, allowing easy removal and improving system cleanliness.

## WAT C 23D (Disalant)

Efficiently removes existing scale deposits, restoring system efficiency.

### WAT C 20B CC (Condensate Conditioner)

Protects condensate return lines from corrosion, ensuring longevity.

### WAT C 20B PT (Pre-Treatment)

Prepares water for boiler feed to improve overall system efficiency.

### WAT C 20B NA Neutralization Agent

Balances pH levels to ensure safe discharge of treated water.

## COOLING WATER CHEMICALS

Ensure smooth operation of cooling systems with our effective cooling water chemicals that minimize maintenance costs and extend equipment life.

### WAT C 30C (Anti-scalant)

Prevents scale deposits in cooling systems, ensuring optimal heat transfer.

### WAT C 33A (Biological Treatment)

Controls the growth of microorganisms, preventing fouling and improving efficiency.

## OTHER PRODUCTS

Complete your water treatment solutions with our range of supporting products.

### WAT C 35 RO (RO Anti-scalant)

Prevents scaling in reverse osmosis systems, enhancing membrane life and efficiency.

### Dosing Pumps

Precision chemical dosing to ensure accurate treatment for various water systems.

### Water Hardness Test Kit

Simple and reliable testing for water hardness levels to monitor treatment efficiency.

### Water Treatment Plants

Comprehensive systems designed to provide clean, treated water for various industrial applications.

## Industries We Serve

**Power Plants | Food & Beverage Processing | Pharmaceuticals**  
**Petrochemicals | Manufacturing & Industrial Operations | Hotels | Hospitals**

## Why Watertech India?

**Quality Assurance:** All our products undergo rigorous testing and quality control to ensure they meet the highest industry standards.

**Technical Expertise:** Our team of experienced professionals provides expert guidance and support to ensure optimal performance of water treatment systems.

**Customized Solutions:** We tailor our offerings to meet the specific needs of each client, delivering solutions that enhance system efficiency and cost-effectiveness.
